(a) Finite system: $n = 8$
rigorous bounds
Haar sample mean
upper
lower
$r_c$
$\overline{T}$
Depolarizing strength $r$
(b) Regular critical window
$n = 1{,}024$ bounds
$n = 65{,}536$ bounds
$\Phi(x)$
bounds on $\overline{T}$
$x = \sqrt{n}\,[1 - H]/\sigma$
